- Mass: ± 66g per pair (10)

Packaging, Storage & Obsolescence

Packed in individual sealed plastic packets and sold as 600 pairs (packs of 12) per woven bag for shipping.

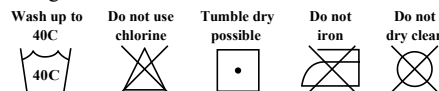

Store in a cool, dry, dark place.

Stored correctly, the gloves physical properties will not change for up to 2 – 3 years.

Cleaning & Maintenance

Gloves should not be left in a contaminated condition if re-use is intended especially if potential hazards exist. Before removal from the hands excess contaminant should first be removed from the gloves. Should this not be possible, it is advisable to ease left and right hand gloves off, using the gloved hand and remove the gloves without the contaminant contacting the bare hands. The gloves must be decontaminated as indicated below.

In order to maximise the glove life cycle, we recommend the mildest possible cleaning conditions in terms of temperature, chemicals and cycle duration.

Due to a wide variety of possible constructions and combinations with other materials we recommend to always consult your professional cleaning service to determine the best suitable cleaning method.

Disposal

All industrial waste should be disposed of correctly according to local regulations and good disposal practice. Gloves should be disposed of considering the hazardous substances they were used for. Please consider recycling. **Sizes Available**

Code	Size	Palm Length
AL0016	L	105mm (±5mm)

Packing & Delivery

Advantage

1. High quality latex, which is not easy to fall off. The dispensing process is encrypted, and the stronger grip makes work easier.
2. High quality cotton thread, can be worn for a long time without stuffiness, and is more breathable.
