

BLUE NITRILE KNITTED CUFF GLOVES

Description

Passion AL06, Blue Nitrile Knitted Cuff Gloves are an excellent choice for professionals in mechanical maintenance, metalworking, and automotive repair. These gloves are specifically designed with oil-resistant and waterproof properties, ensuring a secure grip and protection against spills and stains. Made from high-quality blue nitrile material, they offer superior durability and resistance to abrasion, punctures, and chemicals. The knitted cuff design provides a comfortable and flexible fit, ensuring ease of movement while working. Whether you're handling greasy parts or performing delicate repairs, the Passion AL06 gloves are a reliable companion for your industrial tasks.

Special Instructions

Although the manufacturer has examined these gloves under the system for ensuring quality of production by means of monitoring and inspection, we

recommend that all gloves should be thoroughly inspected before use to ensure no damage is present.

None of the materials or processes used in the manufacture of these products are known to be harmful to the wearer. The gloves and information contained herein are designed to accommodate the basic safety requirements and standards for Personal Protective Equipment. Actual conditions of use cannot be directly simulated in a test environment, therefore it is the responsibility of the user and not the manufacturer or supplier to determine the suitability for intended use.

Specifications

Style: Fully coated nitrile, gloves with jersey lining
 Liner: Jersey lining
 Palm: Blue Nitrile
 Back: Blue Nitrile
 Cuff: Knitted wrist
 Mass: ±110g Per pair (size 10)

Packaging, Storage & Obsolescence

Packed 12 pairs per bundle and 120 pairs per carton for shipping.

Store in a cool, dry, dark place. Stored correctly, the gloves physical properties will not change for up to three years.

Cleaning & Maintenance

Gloves should not be left in contaminated condition if re-use is intended especially if potential hazards exist. Before removal from the hands excess contaminant should first be removed. Should this not be possible, it is advisable to ease left and right hand gloves off using the gloved hand and remove the gloves without the contaminant contacting the bare hands. The gloves may then be decontaminated with mild detergent solution, then rinsed with clean water and dried ideally with some air movement.

Disposal

All industrial waste should be disposed of correctly according to local regulations and good disposal practice. Gloves should be disposed of considering the hazardous substances they were used for. Please consider recycling.

Sizes Available

7-10

Code	Size	Palm Length
AL06	10	125mm (±5mm)

**As per the EN420 standard, actual measurement of gloves are determined by the manufacturer, taking into account the behaviour of the glove material, its thickness (such as leather gloves, PVC gloves etc), elasticity and the intended use.*

**Sizing charts only serve as a guide. Sizes and measurements are for reference only. In order to make an informed decision, always try on the gloves as each glove features a unique construction to accommodate a wearer's preferences.*
